Computer Science Year 10

Main task

Work through the “systems architecture”” workbook. There are links to videos on there to help you, but you also have:

- The textbooks
- The Craig n Dave Videos (link is on the homepage of my website)
- The theory > computer systems section of my website.

Looking ahead

- We are learning networking this term, it would be a good use of your time to watch the networking videos on theory > computer networks.

Extra:

- Logon to MrGorman.com
- Go to Python > Programming Challenges
- Work through the programming challenges. I recommend you do ‘Python challenges 1’ or ‘Python challenges 3’ if you really want a challenge.
- Make sure you have a comment at the top of each program to say what challenge number it is.
- If you don’t have Python at home:
    - Go to the Programming > “How to use Python at home” section of my website http://mrgorman.com/pythonathome/
    - There’s links to 3 websites that let you run Python code in the web browser. Repl.it is probably the best one.
